

Subject: Participate in Our Survey on Awareness of Endocrine Disruptors

Dear Colleague,

We hope this message finds you well.

The Special Interest Group on Endocrine Disruptors (SIG on EDC) warmly invites all healthcare professionals to participate in a comprehensive survey designed to assess current awareness of endocrine disruptors (EDCs) and their impact on the endocrine system. This survey consists of 40 questions and will take approximately 15–20 minutes to complete.

Understanding the level of knowledge among medical practitioners is essential for developing effective strategies to reduce exposure to EDCs and improve patient care. Your valuable input will directly help shape future educational programs, clinical guidelines, and policy initiatives aimed at addressing the global challenge posed by EDC exposure.

This survey has been rigorously developed and validated by experts and is now open for participation.

Your expertise is vital to the success of this project, and we sincerely appreciate your time and insights in strengthening this tool for the endocrinology community.

If you have any questions or require further clarification, please do not hesitate to contact me at rossella.cannarella@unict.it.

Take the survey now and help advance endocrine health!
